# Concept

- ▶ Drone Caddy App is a new technology startup offering amateur golfers an opportunity to view their favorite golf course from a drone fly over, just as seen on PGA tour television coverage
- ▶ Golfers download the Drone Caddy App to their smart phone and get instant access to both aerial video footage of each hole and Pro tips on how to play each hole

# The Offer

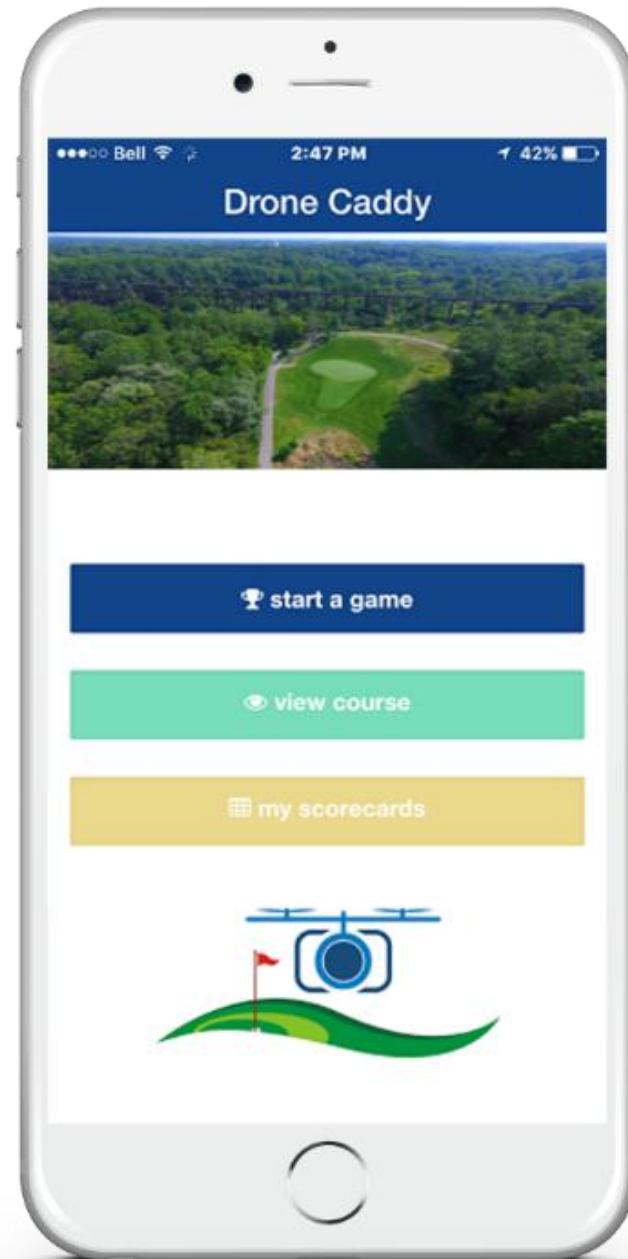

- ▶ The Drone Caddy App team will fly the course for free, build the app for free and we even provide the course with a revenue share of \$1.00 for each app sale
- ▶ Each course gets a custom app to offer to golfers for download, Drone Caddy App charges a small fee (\$5-\$8) directly to the golfer through the app store upon download
- ▶ Drone Caddy App makes the traditional course guides obsolete. No more printing course guides or managing inventory.
- ▶ Once the custom app is ready, Drone Caddy App provides a welcome package including instructions for course staff to direct golfers to the app store to download the app.
- ▶ For about the cost of a golf ball, golfers can view their favorite course like never before!

# App Screen Shots

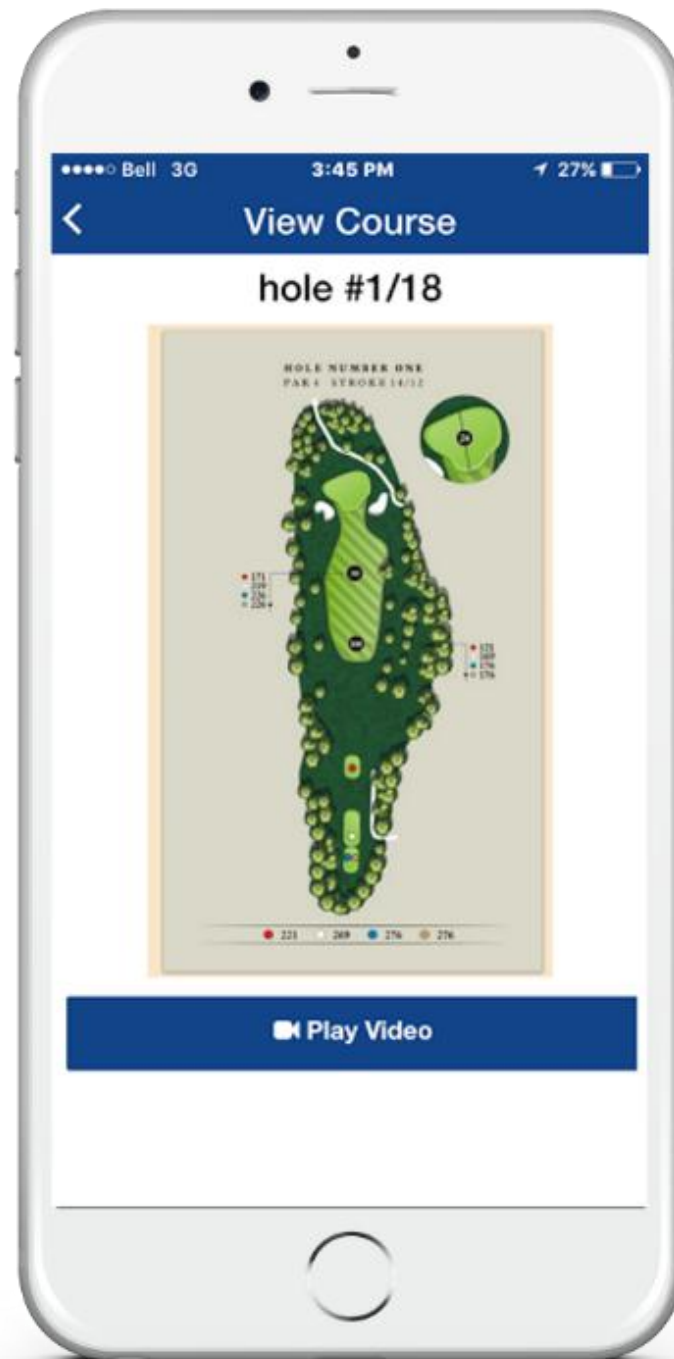

## ▶ Home Screen

- ▶ Start a Game
- ▶ View Course
- ▶ View Past Score Cards

# App Screen Shots

- ▶ View Course
  - ▶ Play Video
  - ▶ (Option to include Pro Tips here)

# App Screen Shots

- ▶ View each video
- ▶ Play time 15-30 seconds

# Getting Started

- ▶ Schedule a time for a Drone Caddy App photographer to video your course
  - ▶ Note we do request a golf cart for use while filming the course
  - ▶ A typical 18 hole course takes 2-3 hours to film
- ▶ Questions? More Information?
